

Appl. No. 10/615,035

Amendment Dated 10/5/2005

Reply to Office Action of 12 July 2005 (three month response period.)

Listing Of Claims:

Claim 1 (currently amended): A system for emergency communication for high-risk residents comprising:

a base unit;

a plain old telephone service "POTS" telephone handset connected to said base unit;

a telephone keypad connected to said base unit;

telephone circuitry operable to establish two way telephone service to enable voice communication over a twisted pair of POTS wiring;

telephone circuitry within said base unit operable to establish two way wireless telephone service to enable voice communication; ~~and~~

control electronics connected to said base unit for selectively switching between said POTS service and said wireless telephone service[.]; and

digital recording and voice recognition circuitry connected to said control electronics operable to activate said emergency communication system from a location remote from said base unit

Appl. No. 10/615,035

Amendment Dated 10/5/2005

Reply to Office Action of 12 July 2005 (three month response period.)

Claim 2 (original): A system for emergency communication for high-risk residents as defined in claim 1 and further comprising:

a speaker telephone connected to said base; and

circuitry within said control electronics to activate said speaker telephone system.

Claim 3 (previously presented): A system for emergency communication for high-risk residents as defined in claim 2 wherein:

said activation circuitry includes circuitry to activate said speaker telephone system by voice commands.

Claim 4 (canceled)

Claim 5 (original): A system for emergency communication for high-risk residents as defined in claim 1 and further comprising:

a distress button connected to said base unit and being operable to connect to an emergency service via a wireless telephone service upon depressing the distress button.

Appl. No. 10/615,035

Amendment Dated 10/5/2005

Reply to Office Action of 12 July 2005 (three month response period.)

Claim 6 (original): A system for emergency communication for high-risk residents as defined in claim 1 and further comprising:

a level sensor circuit connected to said base unit operable to detect a condition of the base unit being disposed in a non-horizontal condition; and

circuitry operable to contact an emergency service in the event the base unit is in a non-horizontal condition.

Claim 7 (original): A system for emergency communication for high-risk residents as defined in claim 1 and further comprising:

circuitry operable to detect a dead line condition of said handset; and

circuitry to initiate a telephone call to an emergency service to alert the service of the dead line condition.

Claim 8 (previously presented): A system for emergency communication for high-risk residents as defined in claim 7 and further comprising:

circuitry to wireless voice communication with a resident by an emergency service in the event an off-hood condition is detected.

Appl. No. 10/615,035

Amendment Dated 10/5/2005

Reply to Office Action of 12 July 2005 (three month response period.)

Claim 9 (original): A method for establishing emergency communication for high risk residents comprising the steps of:

providing a plain old telephone service ("POTS") into a residence;

providing a wireless telephone service into the residence associated with said POTS service; and

in the event of a dead line condition of said POTS service establishing a wireless telephone signal to an emergency service alerting the emergency service of the dead line condition of the POTS service.

Claim 10 (original): A method for establishing emergency communication for high risk residents comprising the steps of:

providing a plain old telephone service ("POTS") into a residence with a base unit;

providing a wireless telephone service into the residence associated with said POTS service and through said base unit;

detecting the level condition of said base unit; and

Appl. No. 10/615,035

Amendment Dated 10/5/2005

Reply to Office Action of 12 July 2005 (three month response period.)

in the event that the base unit is determined to be not level contacting an
emergency service via said wireless telephone service.
